THE REDCLIFF REVIEW THURSDAY, SEPT. 28th, 1934

Number 48

Deal Pending To Put Gravel On Third Street

Several Applications Made for
Prices on Buildings

rather a busy place for the red-cliff council meeting last Monday evening. Several citizens were present with propositions to bring before council.

Mayor Worts occupied the chair and a full council was present.

Mr. G. McKay was present and asked leave for two weeks holidays. On motion of councillor Broughton and Shaw the request was granted and the question of a substitute was left with the town foreman.

Mr. Benjamin waited on council and offered 75 loads of gravel for the old New York Cafe building on Fourth Street. Council decided to enter into such an agreement with Mr. Benjamin on condition that enough gravel were provided to cover Third Street from Broadway to Fourth Avenue.

The offer of \$75 from Mr. Galk for a house on 1st street was refused and the price was set at \$125.00.

Mr. A. G. Osgood's offer of \$75 for house on Fourth Street was accepted.

On motion of councillors Shaw and Broughton council accepted the offer of Mr. Garner for the old delivery barn building in exchange for graveling Second and Fifth Streets.

Mr. Wm. Osborne of Medicine Hat was present in connection with taxes on the old shoe factory building which he purchased from the town. The matter was arranged to the satisfaction of both Mr. Osborne and the council.

The offer of R. N. Rose of \$35 for house on Third street was rejected and a price of \$75.00 was placed on it.

Mr. Bastien asked what rent council wanted for house on First street, and if he would be allowed rent for repairing the building. Rent was set at \$5.00 a month with three months free rent for making the repairs.

A jolly group of about twenty girls and boys assembled on Tuesday evening, at the house of Mr. and Mrs. A. Fitzhery, as a surprise party to celebrate the 14th birthday of their daughter Evelyn. The evening was spent at games, after which sumptuous refreshments were served, to which the young people did ample justice.

Will Ship Vegetables To Drouth Areas

No Freight Will be Charged
For Transportation

Co-operative arrangements for the supply of potatoes, and other vegetables this winter to families in the drought-stricken areas in the south-eastern part of the province, have been completed between the provincial department of agriculture, the railways and the municipalities concerned. Supplies of potatoes are being secured by the department at Edmonton, loaded on cars in bulk direct from the fields. These supplies are being transported entirely free of freight cost by the railways to the required points in the dry areas from where they will be distributed through the municipal secretaries to families who come for them to the shipping points, at the same rate at which they were secured by the department at Edmonton.

The entire arrangement and other agencies working with the department, and the department appeals for supplies to those farmers who are interested in disposing of surplus vegetables at a reasonable price direct from the fields. Some 30 carloads of vegetables have already been arranged for and a number of these forwarded.

After the forwarding of the prizes Mr. W. Hill auctioned the fruits and vegetables which had been donated for the decoration of the church for the Harvest Festival services on Sunday. There was a wonderful display of home grown vegetables, fruits and flowers the most unique being some ground pepper grown by Mrs. Benjamin.

The bidding was good consisting of the small crowd, and a tidy sum was realized from the sale. Mr. Hill, with his Irish wit, made a splendid auctioneer.

Redcliff Reminiscences

Taken from our file of October 2nd—1914.

McLean, McLean and Smith are with the Cameron Highlanders on their way to the front.

The Shoe Factory has orders for \$40,000 worth of goods for spring delivery.

Notwithstanding the much talked of hard times, taxes have been coming in very satisfactorily during the past week.

The new Anglican church will be ready for occupancy by Nov. 1st. Two handsome gifts have been donated. One is a flag staff standing 45 feet out of the ground, donated by Mr. H. Hubbard of the Rolling Mills and the other is a set of heavy organ pipes brought from England and handles of old design for the main doors. A handsome set of furniture for the sanctuary and choir is being made by Mr. W. Cox, a member of the congregation.

One of our local merchants informs us that as a result of a \$2.00 advertisement in the Review two weeks ago he sold in one morning \$67.00 worth of goods advertised. He said this was the only way to let people know of his bargains.

Messrs. Stoner, Lockwood and Wheeler have offered to donate a suitable site for a market for Redcliff. It's up to the council now to put up tables, posts and watering troughs for the accommodation of the farmers.

While playing in his yard last Tuesday, little David Broadfoot met with a very painful accident. One of his playmates threw a stone and hit David on the forehead, inflicting a nasty gash.

It is now around to subscription time again. How is yours

Successful Social At the Parish Hall

Sale of Vegetables After Had
Read; Bidders

The whist drive held in St. Ambrose parish hall on Monday evening was only fairly well attended. The ladies' first prize was won by Mrs. Sanderson and the consolation by Mrs. L. Henderson. The gentlemen's first prize was won by Miss Vivian A. Millan and her father, both of Edson, Alberta.

Miss MacMillan, who is twenty-one years of age, claims to have been seduced by Mr. Brownlee.

On being informed of the action, Mr. Brownlee who is now in Ottawa on the Bank commission, stated: "While one regrets to have to face a case of this kind, still it will enable me to come to grips with rumors that have been spread abroad through the province for some weeks."

There is not a word of truth in the allegations against me and I will defend the action to the limit and hope to show before I am through, the real cause of it."

Immediately after the charges were made public the executive of the U. F. A. met and passed a resolution declaring unconditionally their complete confidence in Mr. Brownlee and confidently affirmed that the net result may rest assured that Mr. Brownlee will be able to vindicate himself fully and that the real nature of those forces and motives behind the charge, will in due course be revealed.

The Annual Supper served by the Ladies Aid of Gordon Memorial Church last evening was a decided success. A delicious supper was served from 5.30 to 7 o'clock to a splendid crowd.

The concert held in the evening drew a fair crowd and was thoroughly enjoyed by those attending. Musical numbers were rendered by both Redcliff and Medicine Hat talent.

Serious Charge Is Laid Against Mr. Brownlee

Premier Claims 'Not a Word
of Truth' in Charge

Alberta was shocked last weekend when daily papers from all over Canada announced that Premier Brownlee was involved in a very serious charge laid against him by Miss Vivian A. Millan and her father, both of Edson, Alberta.

Miss MacMillan, who is twenty-one years of age, claims to have been seduced by Mr. Brownlee.

On being informed of the action, Mr. Brownlee who is now in Ottawa on the Bank commission, stated: "While one regrets to have to face a case of this kind, still it will enable me to come to grips with rumors that have been spread abroad through the province for some weeks."

There is not a word of truth in the allegations against me and I will defend the action to the limit and hope to show before I am through, the real cause of it."

Immediately after the charges were made public the executive of the U. F. A. met and passed a resolution declaring unconditionally their complete confidence in Mr. Brownlee and confidently affirmed that the net result may rest assured that Mr. Brownlee will be able to vindicate himself fully and that the real nature of those forces and motives behind the charge, will in due course be revealed.

The Annual Supper served by the Ladies Aid of Gordon Memorial Church last evening was a decided success. A delicious supper was served from 5.30 to 7 o'clock to a splendid crowd. The concert held in the evening drew a fair crowd and was thoroughly enjoyed by those attending. Musical numbers were rendered by both Redcliff and Medicine Hat talent.

Redcliff Couple Have Anniversary

Mr. and Mrs. Jensen Have
Silver Wedding

Quite a number of friends gathered at the home of Mr. and Mrs. H. E. Jensen on Thursday evening last to congratulate them—the occasion being their 25th anniversary of their wedding.

A very pleasant social evening was spent after which dainty refreshments were served by the ladies.

Outstanding among the many lovely gifts received was a large arm chair presented by the guests conjointly.

The Review joins with Mr. and Mrs. Jensen many more such happy anniversaries.

"College Humor" is Fast Melodic Comedy

"College Humor," Paramount's hilarious words and music version of college life as it ought to be, comes Monday to the Monarch Theatre for a three Day Showing.

"College Humor" boasts an all-star cast, a fast moving story, a top-notch chorus, and music that already has proved successful on the radio and dance programs.

Leading the line-up are: Richard Arlen, Mary Carrigan, Jack Oakie, George Burns, and Gracie Allen, Lona Andre and Mary Kornman.

The Ox-Road Co-eds, a chorus of stunning youngsters, provide the dancing "its music—"Learn to Croon," "Moonstruck," and "The Old Ox Road." Its three hit tunes—written by Sam Coslow and Arthur Johnson.

"College Humor" is the story of a campus at which reputations made on the gridiron are lost in the boudoir where co-eds learn the facts of life more readily than mathematics or science.

The Anglican Church held special services on Sunday last in celebration of its annual Harvest Festival. The church was beautifully decorated with vegetables, fruits and flowers. The choir rendered special music at both services and a vicar preached special sermons for the occasion. Splendid congregations attended the services.

THREE BROTHERS MEET HERE UNEXPECTEDLY

Mr. and Mrs. Robt. Marty have as their guests, their son Oscar, Sheriff of Fort Benton, Montana, and his wife, also their two sons Joe and Robert of Oregon. A strange feature of the visit of their sons is the fact that the two parties arrived at the home of their parents within fifteen minutes of each other, neither one knowing of the intention of the other party to come to Canada at this time. Mr. and Mrs. Marty Sr. and their visitors motored out to East Springs yesterday to visit a fourth son, John. Needless to say there is great rejoicing in the Marty home just now, particularly since Mrs. Marty's health has improved so much during the past few weeks.

May Secure Coal at Mine Here Any Time

Review Has Assurance From
Mine Management

In our last issue reference was made to complaints of farmers who claimed they were unable to secure coal with any degree of certainty at the local coal mine.

Since then we have been assured by the management of the coal company that the plant here is only too anxious to supply the local demand and that they have often gone to considerable inconvenience to do so. We are also assured that coal is available at any time and any day during working hours.

With this assurance on the part of the mine management, it is hoped that farmers of the district will take advantage of the local facilities for their accommodation and also their trading with the local mechanics as well. We might also throw out the suggestion that farmers make it a point to go to the plant for their coal with reasonable hours, when they will be assured of the best service.

SCHOOL NEWS

The High School Literary Society will hold a program on Friday, Sept. 28th at 3 P.M. in the High School room. This is the first program of the term and will take the form of a radio broadcast. The public took a very great interest in our work last year and it was greatly appreciated by all the students. We hope they will enjoy our program this year as much. This program will be open to the public.

Mrs. Norman Willis was taken to the Medicine Hat hospital on Tuesday night suffering from an attack of appendicitis.

Work on the new Van West building is now progressing rapidly. Present hopes are that it will be ready to occupy by the beginning of next week when their pool room equipment and store will be moved to the new stand.

Particulate of the celebration in Medicine Hat this weekend may be seen in their adv page 4

OPTICAL SERVICE

Our Optical Department is equipped with the most accurate and modern instruments known to optical science. The equipment represents an investment of \$4,000. The Optical charge is an honor graduate of Canadian Ophthalmic College, Toronto, also of three post graduate courses. This technical training, combined with over 20 years experience is at your service. Students' eyes tested without charge.

The World Wheat Situation

People who had the privilege of listening to Premier Bennett's speech before the members of the Montreal Board of Trade at the banquet tendered to him on his return from attending the World's Economic Conference, and the Wheat Conference of the leading wheat exporting and importing countries which followed the larger world gathering, undoubtedly learned many things about world matters, and especially wheat, which were entirely new to them and must have impressed them with the magnitude of the problem which now confronts Canada in disposing of its chief article of export—wheat.

Prior to the Great War, Canada was rapidly forging ahead to first place among the wheat exporting nations of the world. Gradually the United States, which had been the great exporter, was relinquishing her position as a wheat exporter and more and more rapidly approaching the stronger economic position which she now occupies. Then came the Great War. When it was in greater demand than ever. Europe was willing to pay almost any price to get it. To meet the demand of the Allied nations it was urged as a patriotic duty upon the people of Canada to equalize in quantity in the army, to raise wheat and more wheat. Greater production of food-stuffs was the slogan, and the most intensive organization was directed to bringing about that larger production. The United States again turned to quota production of wheat because of the prevailing high prices and unlimited market.

The war taught the nations of Europe the lesson of the importance of being able to feed their people in times of war or other emergency. Germany learned the lesson, Italy learned it, France learned it, and, while not directly involved in the war, Spain learned it through the high prices she had to pay for wheat and other imported food commodities.

For a time after the war, while the necessary work of reconstruction of their countries and industrial towns and cities was going on, the countries of Europe still offered a good market for imported wheat and at a high price. But the governments of these countries organized to raise more wheat, meet their own requirements and thus safeguard themselves against starvation on the one hand, or the possibility of being required to pay excessively high prices on the other hand in the event of a further war or world emergency. They offered business to their farmers to produce wheat, they fixed uncompetitive high prices for domestic grown wheat, they imposed prohibitive tariffs on imported wheat, they arbitrarily governed all importations, and fixed minimum quantities of imported wheat that might be used by millers and in the making of bread.

Premier Bennett outlined the effect of these things in his speech. The four great wheat exporting nations are Canada, Argentina, Australia and the United States, the chief of wheat in Europe, and the great wheat importing nations are generally listed as being Great Britain, France, Germany, Italy, Spain. But, Premier Bennett pointed out, whereas European countries in 1930 produced approximately 900,000,000 bushels of wheat, now they are producing more than Canada.

Even more illuminating was Premier Bennett's statement that this year France will produce 1,500,000,000 and 100,000,000 more bushels of wheat than Canada; Italy will produce 75,000,000 bushels more than Canada; Germany and Spain combined will produce 125,000,000 bushels more than Canada. These countries were the former buyers of our Canadian wheat; now they are producing more than Canada.

Mr. F. E. Murphy, who was the United States Government delegate to the wheat conference in London, gives the wheat production of these four great exporting nations this year as 1,015,000,000 bushels, against Canada's estimated crop of 900,000,000 bushels, Argentina's 200,000,000 bushels, Australia's 174,000,000 bushels, and United States' 499,000,000 bushels. In other words, these four European countries will produce almost all wheat this year as the four chief exporting nations. In addition, the Danian countries—Hungary, Roumania, Jugoslavia and Bulgaria—will produce in the neighborhood of 327,000,000 bushels. Russia is steadily increasing her wheat production and, while unquestionably her own people need it, the Soviet authorities nevertheless export large quantities in order to finance necessary purchases abroad.

In the face of this situation, brought about, so Premier Bennett declared, by a condition of things expressed in one little four-letter word, Fear—fear of starvation in the event of another world which contingency is still hanging over Europe, and fear of ransom, or, in other words, of being again compelled to pay excessively high prices for imported wheat in order to stave off starvation—the World wheat conference entered into an agreement which provides on the one hand for a limitation of exports of wheat from the chief exporting nations and a reduction in the acreage sown to wheat by the four largest exporters and on the other hand, for no further increase in production by European countries, except Russia, for a removal or some of the restrictions now imposed by European countries designed to reduce the consumption of wheat by the use of substitutes, and for an eventual reduction in the tariffs now imposed on imported wheat when the price reaches a certain stipulated figure.

Admittedly this agreement is in the nature of an experiment. Whether it will prove practical in actual operation remains to be seen, because there are many factors which enter into the calculation entirely beyond the control of man. However, the facts and figures here presented are undoubtedly of vital interest to the people of Western Canada and provide much food for serious thinking and planning on their part.

"I don't see how you did it and you money?"
"You get it back?"
"Yes."
"Then you don't know me?"

Like America, Australia had no cattle until European explorers came there.
Paris plans to build many schools.

Bowel Complaints of Children During the Summer Months

Mothers should look well after their children during the hot summer months. Despite all they can do the children may be seized at any time with diarrhea, dysentery, mucus complaint, or other forms of bowel trouble. There is a safe remedy in Dr. Foster's Extract of Senna. It is a really reliable remedy that has relieved the distress of millions of children during the 20 years it has been on the market. Don't experiment. Get Dr. Foster's Extract and be on the safe side. Manufactured only by The T. Milburn Co., Ltd., Toronto, Canada.

Progress in New Gold Fields

Large Amount of Work Done on Labrador Claims

Remarkable progress has been made already in the Labrador gold fields, according to Hon. W. J. Walsh, Newfoundland's Minister of Agriculture and Mines, who has returned to St. Johns from the Lake Wabush district.

He was accompanied on the expedition by Dr. O. K. Snelgrove, geologist, and J. W. Froot, mining engineer. All three returned enthusiastic about the future of Labrador.

They reported that of the 22 concessions granted by the Newfoundland government since the Labrador was opened to prospectors last fall, nearly one-half are being actively investigated by field parties. The Lake Wabush camp, which is reached after a 200-mile aeroplane trip from Seven Islands, Quebec, and a population of 30 when they left.

Mr. Walsh and his party spent a week in the interior. They said the results were unusually good. Unsettled weather conditions had interfered somewhat with the work of the field parties but they had a considerable amount of work had been accomplished.

ASHAMED OF HER FIGURE

Husband Persuaded Her To Talk Kruschen

To follow her husband's advice, this woman made a tremendous improvement in her appearance—she actually took off 25 lbs. of her excess fat. Telling of her experience, she said: "A year ago I was troubled with rheumatism in my knees, back, shoulders, and my leg. I was getting weaker and weaker. I was ashamed of my figure. I was persuaded by my husband to take Kruschen Salts. Before I began, I weighed 161 lbs. After taking Kruschen for a short time the rheumatism disappeared. I was feeling stronger, and my leg lighter. I got down to 129 lbs. a reduction of 32 lbs. I was feeling better. I was not boasting when I say that I feel much better figure and am healthier than I have been for years." (Mrs. E. Kruschen is a blend of six ancestral lines which she has inherited. She has gained 25 lbs. of excess fat. She has thrown off each of these pounds of excess fat. She has accumulated in the form of fatty tissue.

Founded Centuries Ago

History Of Bavarian City Dates Back For 1,700 Years

In this year of centuries, tricenarians and bicentenarians all over the world are celebrating the 1,700th anniversary of their city's founding. It was back in 323 that the hardy local tribesmen first broke through the fortified military road built by the Romans, destroyed the citadel of Bircanica and built with its stones a castle called the Wiltburg. Fragments of the city wall erected at that time, with 31 towers and a number of big gates, still remain. The Ellinger ruins in particular, consisting of the finest medieval structures of its kind in all Germany.

Miniature Paintings

Microscope Needed To See Fine Work Of English Artist

Painter of miniatures so small that 20 of them will fit on a postage stamp, Stanley A. Burdett, of London, formerly of the Great War, claims that they are the smallest pictures in the world. Two, each the size of a postage stamp, in size, have been purchased by the Queen. One is a seascape showing a sailing vessel at anchor, the other a still-life of marigolds in a blue vase. To appreciate the pictures fully it is necessary to use a microscope. Many find it difficult to believe that the miniatures are real water-colors painted with a brush.

Destiny In Olden Times

Even the ancient Egyptian had to be told to open his eyes, because they had trouble with his false teeth dropping out occasionally, according to Dr. J. K. Lowry, McGill University, specialist in the branch of dental science. He told of dental work done by the Egyptians as early as 3400 B.C., in a tale before a local service club. He also described known traces of dentistry among the Greeks, Etruscans and the Romans.

Japanese tea exported during 1932 showed an increase of 4,972,000 pounds over 1931.

More than 250,000 persons are now employed by the British post office department.

Prototype Kilogram Valuable

Only About Thirty Standard Measures Are In Existence

A secret mission in the charge of a high official of the London Board of Trade, recently took first, to Paris and then to Seville, the "British prototype kilogram."

This is Britain's official copy of the "international standard" kilogram, on which all metric and scientific measures of weight are based. At Paris, which is the home of the international committee of weights and measures, the "British prototype" was compared with the international standard.

These comparisons have been made only once before since 1889.

The international and the British kilograms were weighed against each other on a balance sensitive to a hundredth part of a milligram. There are 28,350 milligrams to an ounce. The prototype is made of a platinum alloy called iridio-platinum. In spite of the high resistance of the metal to external influences the British kilogram could have changed its weight by a few hundredths of a milligram or so. If minute changes occur they are reported to parliament.

Plans for the journey were kept secret last bedtime might attempt to steal the prototype. A kilogram of iridio-platinum is several hundred pounds sterling as metal alone, while a "prototype kilogram" is naturally worth far more than its price as metal, for there are only about 30 in existence—one for each of the principal nations.

Military Command Changes

Toronto Officer Goes To Victoria To Take Over Military District

Major-General R. C. Ashton, C.M.G., V.D., district officer commanding military district No. 2, Toronto, leaving shortly for Victoria where he will take over military district No. 11, which includes the province of British Columbia and the Yukon Territory.

Brig-General T. V. Anderson, D.S.O., district officer commanding military district No. 10, with headquarters at Winnipeg, replaces Major-General Ashton at Toronto, and it is understood Brigadier W. B. Bean, D.S.O., whose appointment to command military district No. 11 became effective a short time ago, will go to Winnipeg to succeed Brig-General Anderson.

Long Trip For Biplanes

British Machines To Fly 15,000 Miles

Over Africa. Three large British troop-carrying biplanes are detailed to make later this year the longest and most arduous journey yet contemplated over the breadth of the African continent—a journey of 15,000 miles from Cairo in the east to Bulhat and Dakar in the west. Their route goes south as far as Khartoum and thence westward over the Sudan, Egypt, Senegal, Gambia, the Gold and Ivory Coasts, Sierra Leone, the Gambia and Senegal. They will fly over thousands of square miles of territory which were unexplored less than a generation ago.

France has ruled that motion picture films in foreign languages can be shown in only 15 theatres in the country.

A new high-speed passenger and mail liner in Germany has a speed of 226 miles.

For Five Complete Sets of Poker Hands

You can obtain a pair of first quality Ladies' pure Thistle Silk Stockings, 45 gauge. Combined with excellent wearing qualities, these Stockings have the soft, sheer appearance which is so desirable, and they are obtainable in the latest shades. Sizes 5½, 9, 9½, 10.

There is genuine economy in rolling your own with Turret fine cut, as you can make more than 50 cigarettes from a 20c package.

It pays to "Roll Your Own" with TURRET FINE CUT CIGARETTE TOBACCO. SAVE THE POKER HANDS. Imported Tobacco Company of Canada, Limited.

Freight Car Was Elusive

Ex-Sergeant Proved His Did Not Abscond His Post

An ex-sergeant proved an atmosphere of comic relief into the military tribunal at Paris, which was hearing appeals from war-time court-martial sentences when he successfully appealed against a sentence passed in 1918 of 10 days' imprisonment for twice abandoning his post.

Sergeant Nixon was ordered to escort a "light" car containing 500 gas masks. When the convoy stopped for the night he went to sleep, and when he awoke up the car had disappeared.

The railway authorities assured him it would come back. It turned up two days later.

He was then told the train would proceed again next morning but when he looked for it again it had disappeared. Eventually he discovered it had arrived at its destination without the loss of a single gas mask.

In reply to questions he said he did not sleep in the car because a soldier was only allowed to sleep in a horse car during the war. If he had slept next to it on the track he would have been run over. He did not sleep because he had done so they would not have been able to shoot the door. He declared he did not abandon his post because a post is a fixed point and the car was a movable object.

It was a phantom car," he said.

"I kept disappearing," he said.

He was acquitted and the sentence quashed.

Air Permeated With Gas

Carbon Monoxide From Cars Menace To Human Life

Subjecting to a "gas-tight" enclosure intensity from automobile exhausts, residents of large cities some day "require the wearing of gas masks in self-defence," says Sir W. I. DeC. Wheeler, medico-ecologist, who is an honorary fellow of the American College of Surgeons.

Light on the unseen effects of the motor-car upon human life was thrown by Sir William at the meeting of the British Medical Association in Dublin.

A permeation of the atmosphere with gases from auto accounts for an unestimated portion of the annual death rate, he said.

A "fog" of traffic poison has been found to be charged with carbon monoxide at a high concentration, and the blood of those who constantly motor in cities must be similarly polluted.

For one mounted skeleton of a great auk, the Carnegie Museum gave the National Geographic Society a complete skeleton of a cahow.

Both the great auk and the cahow are extinct—birds now known only from a native of Bermuda's families to crossroad puzzle people, was a very large bird which moved around at night and buried itself in the sand by day.

The cahow, a pretty large bird too, stayed in the far north.

Tornadoes are the swiftest of winds, travelling as fast as 400 or 500 miles an hour.

Chance Meeting Recalls Rescue During War

Ship Inspector Meets Sailor He Saved From Torpedoed Vessel

A thrilling rescue in the days when British ships carried on a hazardous trade along routes infested with mines and German "subs" was recalled at Montreal harbor when Captain R. H. Monks, deputy port warden, boarded the steamer "Clan Alpine" in the course of an inspection.

Recognizing a member of the crew who asked if he remembered him, Captain Monks found himself unable to recall who the man was. The man then proceeded to identify himself as the man whose life the Montreal port official had saved during the Great War when Captain Monks' ship had been torpedoed off the Irish coast. About to jump into the sea, the ship's master had been rescued by the captain.

After two days on open sea they were picked up by an American destroyer and taken to an Irish port, where the man was given treatment.

Has Radio Wave Pains

Tacoma Dayrman Is Obligated To Ground Himself To Tunes

Scientists have started an investigation into the unique case of Marjorie Dayrman, a dayrman in the Tacoma district, who suffers intense pains from radio waves unless he grounds himself.

Tacoma and Seattle specialists have declared they were baffled. "Bodker some years ago began to suffer intense pains. Physicians could find nothing wrong with him, but the pains much like rheumatism, persisted from time to time."

One day he put his hands on a water faucet while suffering pains, and they immediately vanished. When he took his hand off the faucet the pains returned. Bodker wrapped a cane with copper wire, bored a hole through the floor of his living room, and "grounded" himself.

The case was brought to the attention of Los Angeles physicians by one of Bodker's relatives living there, and Bodker was persuaded to go to that city.

Human Lend Speaker

Official possessor of the toughest lungs in the United Kingdom, W. B. Anglin, town clerk of Marlborough, Wiltshire, England, aged 63, won the championship from twelve rivals in the National Town-Crier's annual contest at Lyme Regis. The three judges sat in a tent 100 yards from the yelling contestants.

Commodity prices in Belgium are increasing.

Improves cooking CANAPAR

Refined natural flavor of pure cane sugar. Makes all dishes delicious. Adds color and taste to all food. Sold in 25c and 50c packages. COOKING INSTRUCTIONS. Apollon papers prepared. MONTREAL, QUEBEC.

Tornadoes are the swiftest of winds, travelling as fast as 400 or 500 miles an hour.

W. M. U. 2011

(WHEN THE LINDBERGH VISITED GREENLAND)

Science Steps In To Lend Assistance To Ship Navigation And Safeguard Life and Property

It is of vital importance to a shipmaster that he should know from time to time, the depth of water beneath his keel. For centuries a bar of lead, graduated at its base and attached to a rope slowly lowered and as slowly hauled once more to the deck. It was a long arduous task, and the least possible bulk, displaced weight, heavy and noisy ropes. And now steel wire is superseded by a method which employs only sound as its servant. On the keel of a steamship is fastened a resonant coil, forcibly struck by a hammer every two seconds or so. Sound travels through water better than through air, and four-and-a-half times faster. When the anti-sound reaches the sea-bottom they are echoed back to the ship with a record of the time occupied in their flight. The time taken by the anti-sound, with a great deal more. Later, however, is spent in detecting the echo. It is a rocky surface, a sandy level, or a stretch of shale which returns a particular note.

Chief among the hazards of navigation is fog. Fortunately fog is penetrable by ultra-red waves of light, and by radio waves of sound to every amount. In a fog an American ship, through its radio apparatus, keeps in touch with at least two of the one hundred radio beacon stations of the United States. With two messages from two stations before him, the captain readily knows just where he is, and with little or no slackening of speed reaches his destination. Throughout the world today every ship, worthy of the name, has a radio receiver. "What time is it," says "S.O.S. save our ship," the captain instantly moves, with utmost speed, to the ship in distress. It is, of course, most desirable that every ship should have a radio operator on board. Two operators would be better still, but even if there is only one operator in charge, the "S.O.S." signal may be distinctly heard and highly recorded, thanks to a newly devised radio receiver of high sensitivity and dependability.

For a good many years the weather-bureau of the United States and Canada have rendered an invaluable service by their advance notice of storms and tempests. That is, once more, to radio, these warnings are received not only on land but at sea, by every ship in touch with the shore. Boatswains have dashboards in which are mounted myriads of meters and their passengers. It might be supposed that a thermometer, mounted outside a ship, would announce the approach of an iceberg. A better tell-tale is a simple instrument which measures the electrical conductivity of the water surrounding a ship. That conductivity varies with the percentage of salt in the water, and the comparative freshness of that water gives an alarm to be heeded—By George! Yes, says the "Leading American Inventor."

Prince Sells English Farm

Herd Of Pedigree Shorthorns Were Also Disposed Of

A London cable to the New York Times says the Prince of Wales' farm in Nottinghamshire has been sold to G. H. Shelton, with the herd of pedigree shorthorns going to the well known exhibitor, W. B. Shelton.

In connection with the sale it is recalled a recent rumor that the Prince would sell his Albury ranch for purposes of economy, was denied. The Prince bought the Nottinghamshire farm in 1927 and stocked it with cattle from his farm in Cornwall. The buildings were modernized and electricity was used, whereas previously for light and power the object in acquiring the farm was to save his cattle from exhaustive journeys when exhibited at agricultural shows in the North and Midlands.

A Good Exercise. People should walk more; it is the most healthful form of exercise there is, both physically and mentally, says the Kitchener Record. One sees things in walking along that stir the mind to activity and at the same time the lungs are drinking in fresh air and the steady swinging of the feet and arms helps the circulation and sends the blood coursing to all parts of the body.

Experiments in growing tobacco are being made in Egypt, most of the Egyptian cigarette but where no tobacco is produced.

Dairy Awards

Manitoba Takes Silver Cup At Canadian National Exhibition

Award for the highest scoring creamery butter, the silver cup, has been awarded to the Manitoba creamery, of Minnola, Man., by Canadian National Exhibition judges.

Although Manitoba took the majority of awards as usual, competition from Ontario was keen. The silver medal for the highest scoring 14-pound box of unsalted creamery butter to Peel Creamery, Brampton, Ont., with a score of 97.8. The Swift-Canadian Company of Nepean, Man., was a close second.

Modern Dairy, Ltd., of St. Boniface, Man., vied with first prize in the division for salted creamery butter in 20-pound boxes, with the Saskatchewan Co-operative Creamery of Regina second.

Protects Cultivators Of Land

New Law In Palestine Prevents Eviction Of Tenant

The widely expected ordinance for the protection of cultivators has been officially promulgated in Palestine by the high commissioner, Sir Arthur Grenfell Wauchope.

Any tenant who has occupied and cultivated a tract of land for at least a year becomes a "statutory tenant" under the ordinance. He cannot be evicted if he pays his rent, unless the landlord puts it at his disposal in the same vicinity "a subsistence area" approved by the high commissioner.

BY Ruth Rogers

The increasing attention given to pasture fertilization in the stock raising and dairying districts of Canada is creating an appreciable increase in demand for fertilizers.

Clad in warm garments as a protection against the rigors of the climate Colonel and Mrs. Charles A. Lindbergh are pictured during their stay at Gethsemane, Greenland, where they stopped on their long flight to Copenhagen, Denmark, on aerial route survey. Note the youngsters in Eskimo costumes, who greeted the famous couple.

Demand For Fertilizers

Use In Canada Is Showing An Appreciable Increase

The use of various chemical fertilizers in Canada is becoming widespread and in normal times reaches considerable proportions.

There were 60 plants engaged in making mixed fertilizers and fertilizers materials in Canada in 1932, the output of which totaled 256,633 tons. Notes of fertilizers in the year under review amounted to 265,423 tons of which 179,983 tons were exported. Investigative work with fertilizers is carried on by the Canadian Government Experimental Farm System at its branch farms and stations situated in every province of the Dominion. It has been found that for the majority of crops the use of "complete" fertilizer mixtures—ones furnishing nitrogen, phosphoric acid and potash—is best, especially in Eastern Canada and in British Columbia.

The increasing attention given to pasture fertilization in the stock raising and dairying districts of Canada is creating an appreciable increase in demand for fertilizers.

Interested In Tree-Planting

Many Thousands Attend Lecture In Canadian Forestry Car

In a recent twelve-day period the tree-planting car of the Canadian Forestry Association on its annual tour of the prairie provinces visited over a score of places, giving 28 lectures to a total attendance of around 4,000 people. Adverse weather conditions along the lines visited have made tree planting difficult during the past few years, but interest in the work, and a belief in the benefits of tree planting, has not abated.

Since commencing its tour of 1933 the first three months of which were devoted to Saskatchewan, at which has been held in 1934, a total attendance of 25,000 people, mostly rural dwellers.

The past four years, all over the treeless plains, have proved that trees can, and are being successfully grown.

Dangerous For Dogs

Reports come to us of many fatal results to dogs from playing with rubber balls, dolls or other similar toys. One friend writes of five people known to her whose dogs had died from swallowing pieces of such toys. Post mortems disclosed the rubber as the cause of death. We hope all dog owners who see this will guard against this danger—Our Dumb Animal.

ISN'T IT THE TRUTH?

Dealing with the growing expenses in connection with the federal, provincial and municipal government of Canada, a visitor in Toronto Saturday Night brings out some startling revelations. He says: "Federal Provincial and municipal expenditures in 1914 amounted to about 800 million dollars, and the national wealth was about 11 billions. In 1922 our expenditures rose to 589 millions and the national wealth to 22 billions. By 1929 our expenditures rose to 732 millions, and our national wealth to 29 billions, and our net national income to 4 billions. Our expenditure for government in this, a very prosperous year, was 185 per cent of our national income. After two years of depression, namely in 1931, our expenditure for government rose to a little over a billion dollars, while our national income shrank to somewhere in the region of 5 billions, so that in that year we spent one-third of our total income on government. The figures are not available for 1932 but it is known that the costs of government decreased very little while our national income was markedly lower, so that the proportion of our income taken from us was still further increased."

In giving some reason for these growing expenditures he says that "Excessive reliance upon government is a modern tendency and may be extremely demoralizing to any people". He claims that in a Democracy the success of a community depends upon the support and strength its component citizens bring to it, not on how much they can get from it. Then this writer proceeds to enumerate the many demands made upon governments today, all of which cost money and most of which could be regulated and remedied by the individuals or groups concerned, without governmental interference and expense.

Isn't it the truth?

Considering the statement made by Premier Brownlee after being charged with a serious offence and reading between the lines in the resolution of confidence placed in Mr. Brownlee by members of the U. F. A. executive who are close to Mr. Brownlee; from there together with whipsawing heard on the street one would conclude that the hearing of the case in court will be most interesting and that some startling exposures are about to be made. This being the case it might be wise to withhold judgment until after the case is heard. Traps have been set for and dirty deals pulled off on public men before, and history has an unending way of repeating itself. Let us wait and see.

We would advise our readers to look over the advertisements in this paper. They will help you considerably in doing your shopping.

Husky and Happy - Oh Boy!

Forty-eight happy boys and girls at the Royal York Hotel, Toronto. They are the lucky winners of the Silver Token Contest sponsored by Cross and Blackwell, well-known manufacturers of food products, and their reward was a two-day visit to the Canadian National Exhibition.

They all travelled Canadian Pacific and the Royal York Hotel was theirs for two full days. There was much entertaining in the various rooms occupied by the youngsters. The contents of a large number of bottles of pop were consumed. Heads were swept over slick heads and ties

were adjusted before entries were made to the dining rooms, and there was much jolly chatter over meals. Thorough tours were made of the big exhibition and for a long time to come these boys and girls will have happy memories of the two exciting and hilarious days.

Energy For The Future

World Has Supply For Many Thousands Of Years

Ample energy for mankind's future use is contained in the oceans, wind, tides and ocean heat. This is the conclusion of Dr. Arthur B. Lamb, Professor of Chemistry at Harvard University and Director of the university's chemical laboratories.

Each year the world used 17,000,000,000,000 kilowatts calculated on as much energy as is contained in 2,700,000,000 tons of coal; if our supply of natural resources were cut off, it would take the labor of 11,000,000,000 men—5 times the population of the world—to furnish the same amount of energy. At present, only 17 per cent of this total is actual human energy while coal furnishes 50 per cent, and the remainder comes chiefly from oil, wood, and the labor of domestic animals.

Even these present sources of energy represent but a small fraction of the available supply of coal, oil and gas. The untapped reserves of these three natural resources amount to 2-300 times the world's annual consumption of all kinds of energy, that is, at the present rate of consumption, we can get along for a couple of thousands of years.

But this assurance, pleasing as it may be, is insignificant beside the tremendous stores of energy in sources as yet untapped. Annual solar energy to the earth totals almost 42 times the energy of all the world's energy reserves in the forms of coal, oil and gas. Even common winds, if harnessed, could deliver in one year 75 per cent as much energy as coal, oil and gas sources during the next 2,000 years.

Too Many Skyscrapers

New York Should Have Had Limited Building Height Years Ago

In a sense the American city has defeated itself, and New York is a striking example of that defeat. Every new high building on the tip of Manhattan has raised the expense of those below it. Twenty-story houses have cut off the light and air of those of ten stories. Forty-story structures have done the same for twenty-story buildings, and sixty-story skyscrapers have completed the havoc.

The failure of New York years ago properly to limit the height of its buildings has brought to pass that in considerable sections of Manhattan thousands of offices below the tenth floor are practically cellars. Streets have become impassable for automobiles, sidewalks are over-crowded with pedestrians, and it has been impossible to build highways fast enough to meet congestion.—New York Nation.

Shutting Out Fresh Air

Movable Glass Screens Enclose Promenades On Board of Steamships

All the newer ships have spacious sport decks, and there are accurately measured promenades along the sides of the erections outside. But they have become impassable for automobiles, sidewalks are over-crowded with pedestrians, and it has been impossible to build highways fast enough to meet congestion.—New York Nation.

Position Not Preferred

"Now," said the bridegroom to the bride when they returned from their honeymoon trip, "let us have a clear understanding before we settle down to married life. Are you the president or the vice-president of this society?" "I want to be neither president nor vice-president," she answered. "I'll be content with a subordinate position."

"What position is that, dear?" "Treasurer."

Give Services Free

Loyd Macmillan, Chairman of the Royal Commission on Banking, stated at Vancouver that he was serving without remuneration. Mr. Thomas White made a similar declaration. Sir Joseph Stamp also conducted the investigation to grain exchange operations without pay. It may be true to believe, states the Toronto Globe, but there are men who will give time to public service in this way.

Canning Outwits Dog

But When Covered Then Clever Tactics To Escape

The mastery of heretofore which a cat shows when, having been caught in a position from which there is no escape, she calmly sits down to face out the threats of a dog, is a marvelous thing. Everybody has seen a kitten on the street doorway, attacked by a dog ten times her size, as apparently self-possessed as if she were in her mistress's lap. If she turns tail and runs down the street she is lost; the dog will have a sure advantage of her. Even as it is, if he could get up courage enough to seize her on the spot, he would be able to make short work of her.

"You dare not touch me and you know it!" was what her position told the dog. But she is intensely on her guard, in spite of the air of perfect contentment. Her high, curved back, her fur, are ready for a spring. Her claws are unhealed. Her eyes never move for an instant from the dog; as he barks wildly from side to side, barking with constant fury, those glittering eyes of her follow him with the keenest accuracy. If he plucks up his courage, she is ready; she will sell her life dearly. She is waiting her chance and she does not miss it. The dog tries to paw at her and withdraws a few feet, settling down upon his forepaws.

Just as the sound of a dog's bark in the next street attracts his eyes and ears for a moment, and when he looks back the kitten is gone! He looks down the street and starts wildly in that direction, and reaches a high board fence just as a cat's tail—a monstrous tail for such a little cat—is vanishing over the top of it. He is beaten. The cat showed not only more courage than he had, but a great deal more generalship.

Remarkable Plant Found

Belongs To Clover Group and Has Seven Leaves

Discovery of a plant clover with seven leaflets, described as "one of the most remarkable plants found in the United States in recent years," has just been reported by C. V. Morison, botanist of the Smithsonian Institution at Washington.

How such a large and conspicuous species has escaped attention for so long is a mystery to the Smithsonian botanists. It was found growing on sagebrush slopes in Washington by V. Thompson, of Seattle, a local collector, and was sent to the Smithsonian for identification.

The new plant obviously belongs to the clover group, which includes hundreds of species growing in temperate climates the world over, but the plant is nearly two feet high and bore heads of flowers close to two inches in diameter. It is described as a perennial herb.

A remarkable feature, for a clover, was that of the seven leaves growing at the end of a leaf stem nearly eight inches long. Most clover leaves are on short leaf stems, or petioles, close to the main stem of the plant. The leaves themselves were long and narrow, like fingers. Those on the plant studies were approximately a quarter of an inch wide and nearly three inches long.

Oddly Against Them

The best thing for the average man to do is to stay away from the stock market, says a mathematician professor, who has figured out the odds are 12 to 1 against the little fellow who is trying to make a killing. The advice is sound as every one knows, although many may be surprised that the professor's computations give the small fry as much of a chance as they do.

Canada has the largest fourth mill in the British Empire.

Dream Of The Future

H. G. Wells In New Book Forecasts More Ideal Conditions

H. G. Wells has had a "vision" of what is going to happen in the next couple of centuries.

In this he saw a terrible war and the destruction of the present economic system, to be followed by a new order of things in which there will be no rent, interest or profit, and a full and happy existence will be possible for everyone.

Wells recorded this in his new book, "The Shape of Things To Come," published recently.

He traces the history of the world from 1914 to 2114 and paints a picture of a horrible war in Europe in 1940, leading to wholesale death and plague from gas, germs and bombs, and collapse of the world system as we know it.

From the ruins rises a reconstructed world, in which, as he puts it: "There remains no room of becoming passively waiting. Gambling is ruthlessly eradicated. Unnecessary wars with foreign as a monetary offense. Money is given to people to get what they want and not as a basis for further acquisition. There are no speculators, shareholders, private owners or rent lords."

Ingenuity Of Fire Fighters

Improved An Aqueduct To Carry Water Two Miles

A hastily constructed aqueduct which carried water from a lake more than two miles away enabled Ontario forestry branch fire fighters to bring under control a dangerous bush fire which raged for several days in the north-east corner of Falconbridge township near Sudbury.

Owing to recent dry weather all streams within two miles were dried up. The dry bed of a creek, however, ran close by the fire. The forestry branch men hastily dammed the dry channel and pumped water from a lake through a mile of hose to a point on the creek two miles away. When the water reached the dam it was pumped a short distance further to the lake.

Does Not Happen Often

We can't remember a girl of 30 marrying a man of 50 who was really poor, says the Kitchener Record, and states the Toronto Star, most people can't remember a girl of 30 marrying a man of 60 at all—rich, poor or anything else. In Ontario in 1931 there were 5,250 girls, of 20 and under who married, and only 4 of them married a man in the 70-74 age-class. One boy under 18 married a woman of 38.

Wait For Return Of Lake

Irish People Claim Waters Disappear Every Hundred Years

Hundreds of people in the Glengarragh area of County Sligo, Ireland, are watching and waiting for the return of a lake 45 acres in extent and 30 feet deep.

It is Lough Na Bulb, 16 miles from the town of Sligo, and it vanished with its 32,000,000 cubic feet of water in a few hours before daybreak.

To Irish people it was known as the "Lake of the Evil Eye." According to an old legend the enchanted waters disappear once in every 100 years, to perpetuate the memory of the slaying of the evil eye, who was slain in the district by the Giant King Nodda.

In their tidal struggle an eye was knocked out of Balor's head, and so says the legend—a lake was formed.

At night the lake was in its usual state, with a full supply of water, but when farmers went to their fields next day they were horrified to find it had vanished. Heaps of dead fish lay stranded on the mud flats.

In the lake was found a huge cart in the shape of an eye. It was 20 feet long and about 18 feet deep.

Lettuce Is Old Vegetable

Used By Persian Kings 500 Years Before Christ Era

The following article about vegetables is from "In A Week-Rod Garden," by Maude Stewart Delah.

"Egyptians raised an altar to cabbage and the Romans and Greeks made it the first dish of the meal. Cato declared there had been no physicians to the Romans for six hundred years because of their cabbage diet. The physician, Aristomachus, caused his plants to be sprinkled with wine growing to add a delicate touch to his favorite salad."

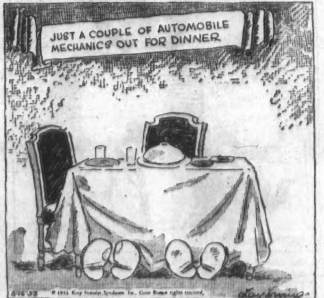

Enforces Strict Law

Sweden has put new teeth in its "Sullivan" law. Anyone who fails to report to the police possession of any kind of a revolver or rifle or shot gun or even the purchase of ammunition is liable to a term in jail. Until just recently only fines have been imposed.

It is almost as bad as any mean things as it is to do them.

FANCFUL FABLES

JUST A COUPLE OF AUTOMOBILE MECHANICS TO GET DINNER.

Canadians Played Part In Aiding Assyrians

In 1918 Officers And Men Went From France To Persia

Recent fighting between Assyrians and Kurds along the Iraq border recalls the part played by Canadian officers and men, sent from the British in 1918, when, fleeing from the Turks, these Nestorian Christians abandoned their homes in the plain of Urmia, and were involved under British protection to Mesopotamia.

The story of their uprising against the Kurds, under whose rule they had suffered centuries of repression, their resistance over a period of four years, and their final dispersal forms one of the most romantic and one of the most tragic episodes of the Great War. It is not generally known that officers and men of the Canadian Expeditionary Force, withdrawn from their units in France in 1918 and sent to the British "Hush-shush" army under General C. D. Spence, played a notable part in salvaging what was left of the Assyrian race.

Approximately 40 Canadians were included in this force, which proceeded in dribs and drabs from Baghdad, over the mountain passes into Persia, and on to Kermanshah and Hamadan. This was one of the side-shows of the Great War, and, in the opinion of the kind, it was unsuccess in achieving what it set out to achieve. However, its presence in Persia enabled Danversville, who is the "Stinky" of Kipling's "Italy and Co.," to bluff the Turkish army around Urmia and the British to evacuate the Persian plateau.

The Assyrians desired to return to the fertile lands in the neighborhood of Lake Urmia; but this was again in Turkish hands and the general threat with red henna, eyes, that alternately glared with a piercing intensity and then closed into an obscure observation of the beguiled, great statue, arresting rhetoric with strange intervals of silence—such is the frontier trouble-maker.

In the records is illustrated by that of the "Red," says Variety. The Italian Lake flagship broke all standing marks for speed, and the "Red" sailed, leaving the blue champagne steamer, rigged itself out in flags and pennants, and sailed into New York to the accompaniment of columns of publicity.

But the passengers had a story to tell. That was going so fast, some passengers say, that the resultant vibration kept them from enjoying the ride, and the nervous passengers lipped with them for several days after they landed.

A number of the usual comforts were done away with in the record trip. The Lido Deck, an open air swimming pool, one of the ship's features, was closed for the trip, captain not wanting the extra water weight burden.

Speed Of Italian Liner 'Spilled Voyage For Passengers'

What it takes to establish transatlantic records is illustrated by that of the "Red," says Variety. The Italian Lake flagship broke all standing marks for speed, and the "Red" sailed, leaving the blue champagne steamer, rigged itself out in flags and pennants, and sailed into New York to the accompaniment of columns of publicity.

Boy Leads

Twelve-Year-Old Has Absolute Power Over Afghan Tribes

There is a stretch of "No Man's Land" between the administrative borders of British India and Afghanistan. This area is inhabited by the Halmai tribe, who are friendly to British rule and have been attracted by a powerful body of Upper Mehmunda. All this trouble created the figure of a 12-year-old boy, Ghulam Nika.

This child is known to be the son of an old border raider, but the mysterious and dangerous leader known as the Mad Fakir, who is actually leading these wild frontier bands, is passing him off as a great hereditary ruler.

Surrounded by his 5,000 marauding followers, this boy is kept in a small white silk tent. He is a slight, delicate child, whose face is said to be exquisitely beautiful. In this dainty tent the boy stays always unaccompanied by his white-clad followers.

Only four men, including the Mad Fakir, are ever allowed inside the tent to see him. They salam deeply before him and mumble some ritualistic jargon. The child then turns on them his huge black eyes, which, they say, have curious mesmerizing powers.

His influence over these wild men is absolute. They believe him to be possessed of a few hairs from the beard of the prophet.

In India the Mad Fakir is known as the Be-Aki Lennani, the first of those whose meaning "witness."

His influence over these wild men is absolute. They believe him to be possessed of a few hairs from the beard of the prophet.

WORLD HAPPENINGS
BRIEFLY TOLD

First silver to be flown out from Great Bear Lake was valued at approximately \$4,000. It was flown out to Edmonton by Pilot John Bythick.

Ocean-borne traffic in the five ports of the Kwantung Leased Territory in Manchuria in the first seven months of this year was greater than in the same period of 1931 and 1930.

The whole village of Capetan, a small Portuguese fishing community near Ponta Delgada, was exterminated recently when 100 pounds of ambergris were found in the carcass of a whale which stranded on the beach.

Dr. Hugo Eckener has concluded an agreement with the Brazilian Government for all-year Zeppelin service between Europe and Brazil. Brazil agreed to erect suitable housing facilities for the airship.

William Cody Bradford, 66, a nephew of Colonel William F. Cody (Buffalo Bill) Cody, shot himself to death at his home in Casper, Wyoming. He was believed to have been depressed because of ill health.

The U.S. Government is considering making the next session of congress for authority to negotiate commercial treaties embodying reciprocal tariff concessions, particularly with Canada and Latin-American countries.

Hubert Scott-Paine will make a second and determined effort to wrest the Harmsworth speed-trophy from Gar Wood, American title-holder, in 1934. A definite statement to this effect came from the British pilot in Bermuda.

Kittlingale Boy's Band, fresh from its world triumph at the Chicago World's Fair, was welcomed home to Vancouver by thousands of persons and massed bands gathered at the railway station. Later they were officially welcomed at the Canada Pacific exhibition.

International Highway
Practically Completed

Attractive Scenic Route From Peace River District To San Diego

A new international tourist highway connecting Canada and the United States is practically completed and will be known under the name of the Sunshine Highway. This highway, the only international project of its size east of the Rocky Mountains, connects Alberta's extensive highway system with that of the States of Montana, Nevada and California, making an attractive scenic route along the eastern side of the Rockies from the Peace River District in Northern Alberta to San Diego, California, on the south, a distance of more than 2,500 miles.

Announcement of the completion of the new route was made at the Sunshine Trail Convention recently held in Lethbridge, Alberta. That stretch of the new highway running through Alberta, from the United States-Canadian border southwest of Lethbridge to the Peace River, a distance of 725 miles, has been completed for some time. Montana is now engaged in completing the last link of the highway in that state.

For the larger portion of the distance this highway is an all-weather route, being gravelled in Alberta, 60 miles north of the city of Edmonton, about 420 miles. The route through Montana, which is Highway No. 91 of that state, is all-weather road the entire distance. From Salt Lake City north to Peace River is a distance of over 1,400 miles.

The new highway gives easy access to the Rocky Mountain resorts of Montana and Alberta by connecting all-weather roads.

Australia's New Currency

Water-Mark Shows Head Of Prince Of Wales

The head of the Prince of Wales, in profile, is one of the innovations introduced in the new currency notes shortly to be put into circulation in Australia. The prince's head will replace the Commonwealth coat-of-arms water-mark. When held up to the light the features of the head to the throne will be seen facing those of the King.

Another change is that the promise to pay in gold has been deleted.

Advance In Television

Bert's big radio show registers marked advances in television. New devices increase picture transmission from the old limit of 90 lines to 180 lines on a 15 by 15 centimeter surface, with almost perfect results. In transmitting 25 pictures per second, 1,000,000 points are flashed off. It is this speed and closeness that give excellent reproduction.

Clock Made Many Trips

Timepiece Of Pacific Line Now In Radio Room At Regina

A clock which made 262 trips across the Pacific Ocean to China on the old "Empress of Japan," and which for the past 11 years has been lying in an office in Vancouver now adorns the operating room of C.R.K.C. Regia, Saskatchewan.

Some 12 years ago, Bert Hooper, engineer of C.R.K.C., but then wireless operator on the staff of the Canadian Marconi Company, was placed on board the "Empress" by the company as operator in charge of the ship's wireless system.

Mr. Hooper had then been with the Marconi Company some six years and was aboard the "Empress" for nearly two years.

When the "Empress" was sold and dismantled records and some of the equipment was taken ashore and placed in the Vancouver office of the Marconi Company.

Some weeks ago Mr. Hooper visited the coast and called upon his old chief, E. J. L. The clock, which is of the Pacific Coast Division of the Canadian Marconi Company.

Before leaving he was presented the clock, which hangs in the wireless operating room of the "Empress."

Modern Wireless Station

Erected On Site Where Marconi Made Earliest Experiment

Signor Guglielmo Marconi is "extremely gratified" to know a modern wireless station has been erected on Signal Hill, site of his earliest experiment in trans-Atlantic wireless telegraphy.

Following the opening of the new Signal Hill station, the inventor of the wireless telegraph Premier F. C. Alderdice as follows: "I recollect the first time I saw the station, when I was a boy, and I was very much interested in the apparatus."

It is so smart erected out in a pretty novelty rarely print. It is in lovely form, and it is very much to be admired. The white picture collar is so unusual.

It is so easily made! Signal No. 528 is designed in sizes 14, 16, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000, 1002, 1004, 1006, 1008, 1010, 1012, 1014, 1016, 1018, 1020, 1022, 1024, 1026, 1028, 1030, 1032, 1034, 1036, 1038, 1040, 1042, 1044, 1046, 1048, 1050, 1052, 1054, 1056, 1058, 1060, 1062, 1064, 1066, 1068, 1070, 1072, 1074, 1076, 1078, 1080, 1082, 1084, 1086, 1088, 1090, 1092, 1094, 1096, 1098, 1100, 1102, 1104, 1106, 1108, 1110, 1112, 1114, 1116, 1118, 1120, 1122, 1124, 1126, 1128, 1130, 1132, 1134, 1136, 1138, 1140, 1142, 1144, 1146, 1148, 1150, 1152, 1154, 1156, 1158, 1160, 1162, 1164, 1166, 1168, 1170, 1172, 1174, 1176, 1178, 1180, 1182, 1184, 1186, 1188, 1190, 1192, 1194, 1196, 1198, 1200, 1202, 1204, 1206, 1208, 1210, 1212, 1214, 1216, 1218, 1220, 1222, 1224, 1226, 1228, 1230, 1232, 1234, 1236, 1238, 1240, 1242, 1244, 1246, 1248, 1250, 1252, 1254, 1256, 1258, 1260, 1262, 1264, 1266, 1268, 1270, 1272, 1274, 1276, 1278, 1280, 1282, 1284, 1286, 1288, 1290, 1292, 1294, 1296, 1298, 1300, 1302, 1304, 1306, 1308, 1310, 1312, 1314, 1316, 1318, 1320, 1322, 1324, 1326, 1328, 1330, 1332, 1334, 1336, 1338, 1340, 1342, 1344, 1346, 1348, 1350, 1352, 1354, 1356, 1358, 1360, 1362, 1364, 1366, 1368, 1370, 1372, 1374, 1376, Occasional Wife

EDNA ROSE WEBSTER
Author of
"LIPSTICK GIRL, etc."

SYNOPSIS

Camilla Hoy, young and beautiful, fails to live with her mother, a well-to-do student in an art school. She is adopted daughter of a wealthy family, and he is a poor, struggling sculptor. On their first date Peter spends most of his money on a little Camilla a good time, and then decides he must give her up, as he cannot stand the financial pain. A chance meeting, however, paves the way for another date. This time Peter goes to the park, Camilla tells Peter that she is not rich, or, at least, will not inherit the Hoy fortune. Peter in turn confesses he is practically penniless. They fall into each other's arms. (Now Go On With The Story.)

CHAPTER VIII.

When Camilla and Peter had gratified the weeks of their longing for love of each other with incoherent words and repeated kisses, Peter held her off and exclaimed, "To think how near I came to losing you! And I should have, if you had not said 'no' to me!"

"That was why I dared to tell you, because I had to. And at the same time, I was sure that I should be would be the end. There is no explaining the way things happen, is there?"

Peter was silent for a minute, then turned away from her suddenly and exclaimed, "But, Camilla, don't you see, dear—your not being Miss Hoy makes it all the more impossible for you to love me."

"What do you mean, Peter?" alarm ed.

"Because I have no money, either. I can't take care of you—oh, five years—perhaps never. Mrs. Hoy is right—you must find someone to love who has plenty of money to take care of you."

"But didn't I just tell you that I was preparing to take care of myself?"

"Oh—that! For awhile—yes. But you must think of your future."

"That is just what I am thinking of—what my future would be without love."

"Surely, there is someone you could care about who has money and influences that will give you the happiness you deserve." He did not sound very convincing but he was trying to be genuine.

"There is no one in the world who can make me happy, except you, Peter," she purred her head close on his shoulder like a forlorn child seeking protection.

"Precious! Camilla, you make me wild. If only I could make you happy!"

"You can if you love me enough," nuzzled.

"Love you! I love you too much! But I can't take care of you for ever so long, and perhaps I never could give you what you have wanted."

"Will you stop saying that, Peter!" she demanded severely. "I don't want the things I have had—ever. I want you! Don't and me away from you!" Her hands reached up and clasped around his neck. Her lips lifted to his. Peter took them eagerly, lost to all practical reasoning.

"They murmured together. 'I won't, darling, I promise. We'll find a way.' Presently, it was Camilla who drew away suddenly and exclaimed, 'Why, Peter, it is you who should marry a girl with a fortune, so you can be free to study and work without worrying about money. That would mean everything to you. I'm sorry I forgot your side of it. For heaven's sake, I'll go away and take care of myself and find someone else. Now it was Camilla who tried to be cheerful and convincing and generous."

Peter drew her close with an indulgent laugh. "You precious little goose! What should I have to work for if I lost you? Having you would be my surest chance of success, Camilla. With you for my inspiration, the sky's the limit for me. We shall dream and work together, and you and I there are dreams in your eyes, that promise me so much, darling. How we shall live, together."

"You are sweet!" she told him, timidly caressing his face.

"But I haven't told you all about me, dear. I have no family here, except some older brothers and sisters."

WEAK WOMEN
Take Lydia K. Pinkham's
Vegetable Compound

Have you ever felt that you were too weak to do anything... that you did not have the strength to do your work? Women who are weak and run-down should take a course with Lydia K. Pinkham's Vegetable Compound. Headaches and backaches are cured. It is a blood purifier and builds up the system.

30 out of every 100 women who report to us say that they are benefited by this medicine. Here is a letter from a woman who writes: "I feel better than I have for years... and much the result."

place. Now I have you and want to tell you into them from the beginning."

"Please tell me just what you had planned to do before you found me. Her tone was as matter-of-fact as if they were only new business partners."

"But that is the past—before I found you," Peter objected.

"Tell me, anyway," she insisted.

"Why, there was nothing very definite except that I was going to work very hard and sacrifice everything to succeed. I had planned to enter something in the National exhibit next fall to compete for the Paris scholarship. On the long chance that I won it, I hoped to make enough to pay my expenses over there by doing anything I could."

"So you are?" Peter asked.

"You are marvelous!" Peter declared solemnly.

"So are you? Do you know what you reminded me of the first time I met you?"

"Aye tank aye go home!" he laughed.

"I have Spanish and French and some Italian," Camilla added. "We speak that foreign language shop."

"Or build a tower of Babel," "We'll tell the children do that," she reminded him, shyly.

Beautiful Indian Capital

Everything in Jalpa is Built On Fairyland Hoops

The Maharajah of Jalpa, who has been in the highlight more than once of late, returns to it again by winning the Prince of Wales' Cup at Antwerp, and his polo team. His native Jalpa sounds like an old beautiful dream for everything there is to be built on a fairyland hoops. The houses in the capital are painted in every conceivable shade of pink and purple, delicately traced with patterns of other colors, and they gleam shutters are on every window. There are patios in the streets, and the royal stables near the palace are crowded with horses and elephants. A touch of realism is servatory, but even it is unusual, for it contains the world's largest sun-dial.

"You couldn't!"

"I shall if you let me hurt your work. I love you too much to hurt you like that."

"So much that you could leave me if you believed it would be better?"

"Yes, Peter."

"Oh, my dear!" his voice held awe.

"But you are to remember that love, you would hurt me now more than anything else could have possibly happen to me. Shall we both go on with our plans as we had made?"

"Everything nice—of many southern skies and brilliant flowers, intoxicating fragrance and sparkling blue waters, of glamorous tropical moonlight and music and my laughter!"

"I hope I always shall remind you of my lovely things, Peter."

"Happy, dear!"

"So happy I shall never be unhappy."

"Or like?"

"After awhile, he said, 'But we haven't planned for the future at all. There is so much to decide. Everything is different now.'"

"Peter," he said severely, "if you let our love change your plans and ambitions the least bit, I shall be very unhappy."

"But I didn't have you in those

them, for awhile, just seeing each other when we saw them."

"Not going to the Majestic and the Madison. Oh, Peter, that was terrible. You must let me pay you back the money you spent that night."

"Don't say that—dear. If I always have as much pleasure from the money I spend as that gave, I'll get enough from life. Please don't mention it again."

All right, but you must not spend your money on me again. We can walk and talk together in the park often, and have little parties like the summer when you are not too busy."

So they planned confidentially, as only lovers who know little of the caprices of life may dare; for to them the future always beckons along a straight shining road.

(To Be Continued.)

Cambridge Scientists
Return From Expedition

Bring New Species Of Animals and Reptiles From Jungle

Many animals, reptiles and insects hitherto unknown to man were discovered by three young Cambridge scientists who landed at Plymouth from an expedition into the unexplored jungle of the British Guiana.

The adventurers, I. T. Standen, G. Russell and H. P. Beaton, members of the Percy Sladen expedition, have brought with them a collection of 7,000 specimens, in search of which they have penetrated into country hitherto unexplored by white men.

The collection includes: Flying squirrels equipped with "parachutes" of varied colors by which they fall from tree to tree. A giant water spider belonging to a species thought to have vanished ages ago.

A five-foot male gorilla. One hundred and fifty specimens of mammals, birds, reptiles and insects.

Thousands of rats, lizards, frogs and spiders.

A frog that is covered in hair and another that has claws.

Mr. Standen stated that he had two gorillas, one of which died in captivity.

The natives, he said, are convinced that the gorilla is a "retrograde human being," with habits that are human, but they considered that the chimpanzee is definitely a monkey.

In the Asamibo district, he added, "we discovered an uncharted mountain range, which appeared geologically to be of comparatively recent formation."

"Our most thrilling experience was when we were lost in thick virgin jungle. We were surrounded by impenetrable forest, and then one day we sensed rather than heard, the sound of native drumming, and by following for a day and a night we came to a native village and so found ourselves again."

Make Six-Year Tour

English Chef Collecting Recipes From Every Country in World

A Suffolk chef, Harold Hogan, is engaged on the queerest world tour ever known, for he is spending 36,000 pounds in search of little-known recipes in order that he may add variety to Britain's culinary tastes.

Already he has visited Denmark, Germany, Ireland, Scotland, Norway and Sweden, and already his pockets are bulging with recipes which he has obtained in foreign lands.

After a short sojourn in Iceland he is off to France, Italy, Spain, Turkey, South Africa, Australia, America and Canada, where he hopes to receive thousands of appetizing recipes.

His novel world search for recipes will take him six years—and at the end he should be the most knowledgeable chef in the world.

Norway will boost government taxes.

Canadian-made shaving brushes are on sale in Belgium.

Retirement Well Earned

Two Sisters Served As Missionaries For 35 Years

Corral stone churches on scattered South Sea islands, a school for Micronesian boys and girls, the Bible and other Christian literature and school textbooks translated into Russian—these are some of the results of the work of two American sisters who started out from Newark, N.J., 35 years ago and now have just been retired.

The sisters are the Misses Elizabeth and Jane Baldwin, and their retirement was voted by the American Board of Commissioners for Foreign Missions.

For 20 years the sisters were the only white persons on the small island, Kugan, on which they lived. They moved the islanders through sickness; remained with them through hundreds of furious tropical storms, and helped them through succeeding famines.

After translating school books, with their own hands the sisters prepared for printing. Books were laboriously turned out on an old hand press until, on their twenty-fifth anniversary in the islands, a machine press was sent from Boston.

Everything has been done of planned by the two women. Thus, when a constant reservoir and typhoon house was built, Miss Elizabeth supervised the erection thereof.

Members of the First Presbyterian Church, Newark, they sailed to the island first under the Woman's Board of Missions, now united with the American Board. In all their years in the islands they never had accepted any compensation.

These sisters have they visited America, in 1911, Miss Elizabeth, who was 59 when she left America, is now 74 and nearly blind. Miss Jane, who was 55 when she sailed, is now 80.

Everything has been done of planned by the two women. Thus, when a constant reservoir and typhoon house was built, Miss Elizabeth supervised the erection thereof.

Members of the First Presbyterian Church, Newark, they sailed to the island first under the Woman's Board of Missions, now united with the American Board. In all their years in the islands they never had accepted any compensation.

These sisters have they visited America, in 1911, Miss Elizabeth, who was 59 when she left America, is now 74 and nearly blind. Miss Jane, who was 55 when she sailed, is now 80.

After translating school books, with their own hands the sisters prepared for printing. Books were laboriously turned out on an old hand press until, on their twenty-fifth anniversary in the islands, a machine press was sent from Boston.

ST. CHARLES MILK
UNBLENDED UNADDED

Little Fells For This Week

"O the depth of the riches both of the wisdom and knowledge of God! how unsearchable are His judgments, and His ways what finding out!"—Romans 11:33.

No star is ever lost who once have seen. We may be what we might have been.

Since God, through only thought, has life and breath, God's life can always be redeemed from death.

And evil in its nature is decay; And any hour can blot it all away. The hopes that lift in some far distance may be a truer life, and this the dream.

—A. A. Proctor.

Dr. Bernard has said: "As if thou dost a noble and hard life, and unceasingly prayest to God for it. If thou continue constant in this desire, it will be granted to thee without fail. And if God has not given it thee, thou shalt find it in eternity; of this be assured." Therefore do not relinquish your desire though He do not fulfill humbly, or though you may weary from your aspirations or even forget them for a while. The love and aspiration which are constant in the heart before God, and in Him ye shall find the truth thereof; that is, to its entirety, it shall be better for you than if you had never felt them.—J. Tauber.

Train Accidents

Seven Passengers Killed On Canadian Roads Last Year

Last year there were seven passengers killed and 339 injured in train accidents, the Dominion Bureau of Statistics says in a report issued recently. This was an average of one killed for every 3,000,000 carried and one injured for every 62,000.

Injuries to passengers ranged from scratches and bruises to more serious injuries. Two passengers were killed in collisions, two fell from trains, two were getting on or off trains, and one from other causes.

There were 67 employees killed in train accidents last year, and 1,000 injured, the report, a record for the last 22 years. There were 94 persons killed at highway crossings, of which 78 were killed by trains, and the number 30 were killed at protected crossings.

STRING BEANS BROTHERHOOD

Two tablespoons butter; 1 medium onion; 1 tablespoon flour; 1 cup evaporated milk; 1/2 cup water; 5 cups cooked string beans; cut in one-inch lengths; salt; pepper; paprika.

Melt butter. Fry thinly-sliced onion until yellow, but not browned. Stir in flour. Add gradually evaporated milk and water. Simmer until thickened. Add cooked string beans; cut in one-inch lengths and seasoning. (Serves six).

No Longer Interested

Two political candidates were discussing the coming local election. "What did the agent say when you told them that you never paid a dollar for a vote?" queried one.

"A few cheered, but the majority seemed to lose interest at once."

The matter but is so-called because its previous up-to-date-coversing shames, lining drawers, etc.

Increased demand for coffee is boosting business in Salvador.

Cover Shelves with HANDI-ROLL

HAMILTON, ONTARIO

Accurate Stimming Up

"Motor ship was this summing up in a court of appeal in connection with a court case arising as the result of a motor car accident." The court has said three times, and I want it to be generally known that if you are going out with a good car, you must pull up within the limits of your vision, and an accident happens, you are in the wrong."

Contest to Finish Saturday at 10 p. m.

All Votes must be handed in by 6 p. m. Monday Night Prizes will be handed out to Winners same night at 8 p. m. Every Purchase Made; Every Article Paid For Before the Contest Closes Gets More Votes - Get your votes and WIN A PARKER PEN

The Clinic will be held on
Wed. Oct. 4th. in Gordon Memorial
schoolroom.

Mrs. Bolger (nee Annie Bras-
ley) and small son left Thursday
night for Almont, Ont. to visit
Mr. Bolger's parents.

Word was received in town
this week announcing the death
of Robert Black of Canmore
after a long illness. Deceased
was 62 one time a resident of
Redcliff and was in the pool
room and jitney business.

Mr. E. T. Cooke had his twenty-
ninth birthday on Friday
last. He celebrated the occasion
by polishing up the Cash
Register in preparation for the
good times just ahead. He says
the first sixty years are the
worst. After that something
better is bound to happen.
